## TAPERS

### L-Clip 300

The L-Clip 300 applicator securely applies various widths of many types of packaging tape. The L-Clip 300 was designed with the operator in mind and is perfect for sealing all types of boxes and cartons. The operator places the product to be sealed onto the table top and pushes the box forward against the activation plates. This activates the machine and the desired length of tape is secured onto the leading edge of the box - both side and bottom. The L-Clip 300 does the widest range of tape and up to three inch wide BOPP tape.

#### Standard Features:

- Electric over pneumatic
- Heavy duty work-stand with adjustable height
